VIDEO ANALYSIS SOFTWARE

+ LAUNCH MONITOR INTEGRATION

SWING CATALYST SOFTWARE

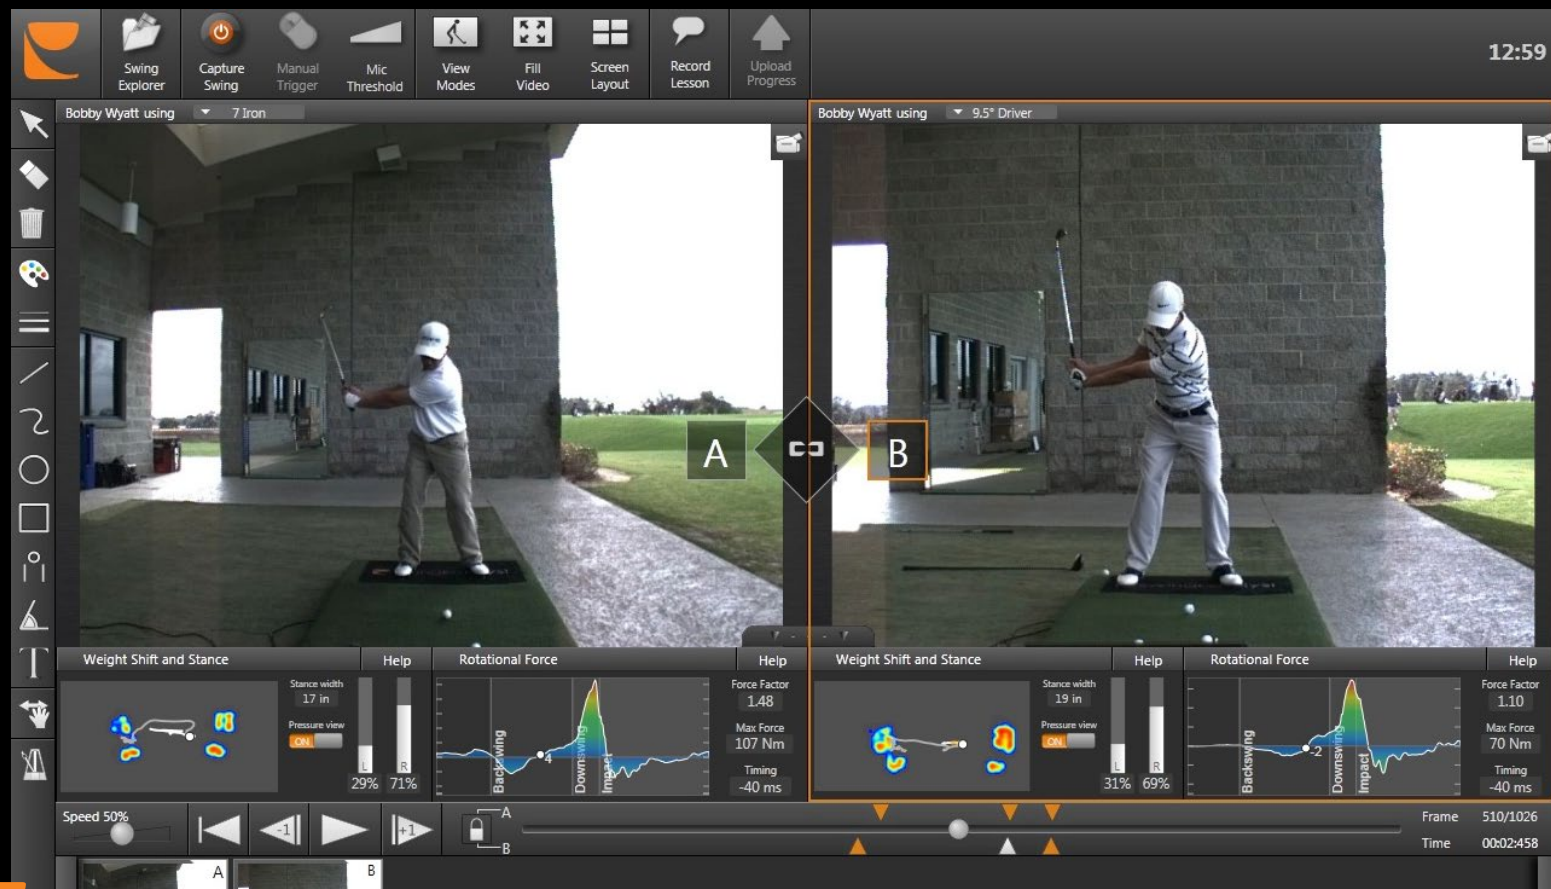

Swing Catalyst offers a comprehensive and powerful, yet affordable video analysis software package that has been praised by coaches around the world for its user friendliness.

No matter if you are using handheld cameras such as the popular Casio Exilim or more advanced studio cameras capable of streaming live video images, Swing Catalyst has the solution for you.

Do you own a launch monitor? Swing Catalyst integrates all ball flight- and club data seamlessly with the video analysis.

Recording video summaries for your students branded with your own logo and contact details is essentially a one-click affair.

Some of the main features:

The Swing Catalyst software lets you compare swings using the side by side mode. You can playback each recording at any speed and choose to synchronize two swings at any point during the swing.

The software offers a number of drawing tools that will assist your analysis and make it possible to highlight areas for improvements.

The software supports up to 4 cameras, all perfectly synchronized. Choose from a range of handheld consumer cameras such as the Casio Exilim, or more advanced high-speed USB-, Ethernet- and FireWire cameras (please find a complete list of recommended cameras on www.swingcatalyst.com).

Swing Catalyst runs on Windows, but can also be used on a Mac. Please visit www.swingcatalyst.com to learn more about running Swing Catalyst on your Mac.

SWING CATALYST FEATURES

RECORD A LESSON

Swing Catalyst lets you record lesson summaries branded with your own name, logo and contact details in just a click. You can share the videos on Facebook, or even send the video to your students' smart phone. This makes it an easy task for the student to review what you have been working on and to come prepared for your next lesson.

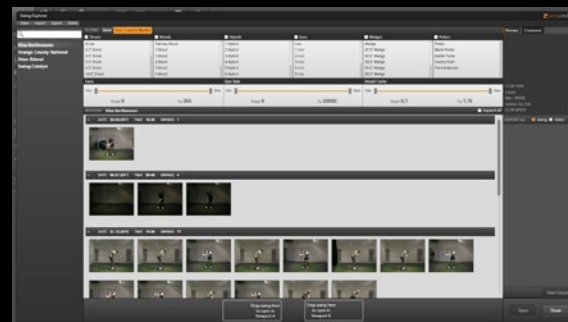

YOUTUBE, FACEBOOK AND TWITTER

You are also able to upload lessons directly to YouTube, and email a private link of the video rather than the video file itself. This is very convenient if you prefer to record lengthy videos. It also enables your students to easily share their lesson on Facebook or Twitter.

LAUNCH MONITOR INTEGRATION

If you are using a TrackMan, a FlightScope or a GC2, all ball flight- and club data are seamlessly integrated and stored together with the video images. This makes it possible to see if your student has improved his or her results over time.

ORGANIZE YOUR SWINGS

The Swing Catalyst explorer organizes all your recorded swings by name, date and time. It also lets you find, sort and rediscover your students' swings based on: type of club, carry distance, spin rate and/or smash factor using our unique filtering feature.

A complete game improvement system for golfers
